

Freshly ground perfectly brewed coffee? Based upon new logic and advanced technology we have developed a coffee machine which lives up to all the criteria that coffee lovers around the world demand of us and our machines. It is about perfectly brewed coffee, exclusive design, flexible technology, energy efficient operation and minimal environmental impact during the lifetime of the coffee machine.

Our aim is nothing less than perfect coffee. Something that involves a combination of coffee beans, water temperature and technology. Precision for the brewing temperature and time, coarseness of the grind, and recipe options which conform to our unique taste in coffee. Taste is precision and passion. This is our passion.

Cup holder and Condiment shelf as accessories

Base cabinet as option

CQube SF01

- Canister for pre-ground coffee
- Push button panel or 7.5" Touch screen
- Programmable energy save mode
- Cupsensor as option
- Cup / Waste counter
- Noise level approx 60 dB
- Base cabinet as option

CQube SF03

- Canister for pre-ground coffee
- 2 ingredient canisters
- Push button panel or 7.5" Touch screen
- Programmable energy save mode
- Cupsensor as option
- Cup / Waste counter
- Noise level approx 60 dB
- Base cabinet as option

CQube SF12

- 1 Grinder 1 bean hopper
- 2 ingredient canisters
- Push button panel or 7.5" Touch screen
- Programmable energy save mode
- Cupsensor as option
- Cup / Waste counter
- Noise level approx 76 dB
- Base cabinet as option

- Panel to place machines together
- More outlets for coffee to minimize queue
- Magnetic mounting

- Placement of water filter behind panel
- Branding Possibilities
- 16 cm wide
