

EXPOBAR OFFICE

EXPOBAR OFFICE LEVA

Office is a small and compact espresso machine that fits in equally well in the office or small café as it does in the home. Despite its size, it is of course built with precisely the same well-proven technology and genuine craftsmanship that is the hallmark of all Expobar's machines. Office Leva is equipped with a two boiler system, one boiler for steam and one that preheats the incoming water. This preheating ensures the correct temperature for extraction of the coffee. The two tanks also make it possible to prepare an espresso and to froth milk at the same time. The machine is also equipped with the latest generation's PID sensor system in order to guarantee an even brewing temperature.

FACTS

- One brewing group
- Automatic or manual water filling
- Integrated water pump
- Pre-infusion chamber
- Hot water dispenser
- One steam pipe for milk frothing
- Brewing boiler capacity 1.5 litres
- Steam boiler capacity 2.75 litres

EXPOBAR OFFICE

EXPOBAR CONTROL

Office is a small and compact espresso machine that fits in equally well in an office or a small café as it does in the home. Despite its size, it is of course built with precisely the same well-proven technology and genuine craftsmanship that is the hallmark of all Expobar's machines. Office Control has manual water filling, a 2.75 litre water boiler and four different programmable coffee doses. Thanks to Office, a perfect cup of espresso can be prepared in a wide range of environments.
