Café Crema

Coffee with Milk

Black Coffee

Tea

Elegantly **Simple**
Beautifully **Functional**

Quartz One Touch delivers the same barista-quality coffee that all Expobar machines are famous for, yet in an easy to use, space saving size. Thanks to its high performance components and rich features that will satisfy even the most demanding barista, Quartz One Touch creates the perfect espresso or cappuccino at the touch of a single button.

Quartz One Touch is equally at home working behind the counter in small restaurants and bars, or offering self-service beverages in offices.

THE PERFECT CUP OF COFFEE

Quartz One Touch will pamper your clients, guests or staff with fantastic coffee. Fully programmable to tailor each drink to any coffee menu. With an extremely accurate PID temperature control and its possibility to set pre-extraction your espresso will get perfect crema. The machine has a hygienic milk foaming system and adjustable milk meter that provides excellent foam of the milk.

Prepare tea from the manual hot water dispensing and if you want to use the machine as a barista you can always steam milk from the manual pipe.

CONVENIENCE AT EVERY TURN

- User-friendly design with four pre-set drink selections.
- Extremely durable stainless steel auto-ejecting capsule group.
- Environmentally sensitive, cost reducing energy-save mode.
- Fast heat-up for quick use.
- Easy to clean.
